

AFRICOM Travel Medical Checklist

- A.** As soon as possible meet with your home station medical team for travel medicine counseling, medication prescriptions, and immunization review/administration. Optimal immune response to vaccine requires several weeks.

Immunization requirements are determined using the below DHA website:

[Vaccine Recommendations by AOR | Health.mil](#)

i. REQUIRED IMMUNIZATIONS:

- COVID-19
- Hepatitis A
- Hepatitis B
- Influenza
- MMR
- Meningococcal
- Pneumococcal (required for certain health conditions and for age 65 or over) [Pneumococcal Vaccination: Who and When to Vaccinate | CDC](#)
- Polio (primary series and 1 adult booster dose)
- Tdap or Td (booster required every 10 years)
- Typhoid (booster required every 2 years)
- Varicella
- **Yellow Fever (must be documented on a CDC 731)**

- ii.** Bring your COVID-19 Vaccination Card

B. Medication Requirements:

- i. MANDATORY:** Malaria prevention medications (from home station medical team)
- ii. MANDATORY:** Travelers' Diarrhea treatment medications (from home station medical team)
- iii.** Bring sleep medication if needed (from home station medical team)
- iv.** Bring personal supply of oral rehydration solution (e.g., Liquid I.V.[®] or DripDrop[®]) to self-treat Travelers' Diarrhea.
- v.** For any chronic medical conditions requiring specialty care, obtain medical clearance to travel from your primary care manager. Bring a 30-day supply of all prescription medications.

C. Other Considerations:

- i.** Bring broad-spectrum sunscreen (SPF 30 or higher), insect repellent (30-50% DEET, 20% Picaridin, IR3535) as well as appropriate clothing and headgear for outdoor events and weather extremes.
- ii.** Travel between locations may include vehicles, buses, and aircraft. If you are susceptible to motion sickness, bring medication for symptom prevention/relief such as scopolamine or meclizine.
